WARNING: This product is only part of an overall safety program. No shoe can protect you from injury in all situations. All safety shoes are used in environments where hazards exist beyond the scope of protection a safety shoe can offer. SLIP RESISTANT SHOES ARE NOT "Slip Proof". Environmental factors including but not limited to oils, water, dust, flour, ice, objects on the floor, or other hazards can reduce the effectiveness of slip resistant footwear. Also, cold environments including freezers and coolers will significantly limit the effectiveness of slip resistant footwear. It is possible for you to slip, fall, and/or be injured while wearing/using personal protective equipment including slip resistant shoes or ASTM rated safety shoes. You should always take precaution and consider the environmental hazards around you when wearing your protective footwear. All products are sold subject only to the warranties given by the manufacturer. If the product is marked as meeting an ANSI or ASTM standard, then the product carries a manufacturer’s warranty. Saf-Gard Safety Shoe Company/SR Max Slip Resistant Shoes provides no express warranty and expressly disclaims all implied warranties including, without limitation, any implied warranty of merchantability or fitness for any particular purpose.

SAFETY PROPERTIES

- Steel Toe
- Composite Toe
- Alloy Toe
- ASTM Electrical Hazard Rated
- ASTM Static Dissipative Rated
- MaxTRAX® Outsole Technology
- Waterproof
- Side-Zipper
- Insulated
- APMA Accepted
- Made/Assembled in the USA
- Cold Storage Outsole Technology
- Slip Resistant
- DryKick® Splash Protection
- Security Friendly Construction
Tackle your day like a boss...

FAST, FREE SHIPPING • 30-DAY SATISFACTION GUARANTEE • 6-MONTH DEFECT WARRANTY • FREE EXCHANGES

WARNING: This product is only part of an overall safety program. No shoe can protect you from injury in all situations. Safety shoes are used in conjunction with other protective equipment, such as hardhats and hearing protection equipment. Steel toes, composite toes, or alloy toes are designed to provide additional protection to your toes. A safety shoe toe type is not the only factor in providing overall safety. A safety shoe toe type is designed to provide protection against only the type of dangerous events for which the toe type was intended. A steel toe shoe is not made to stop a falling object, a composite toe shoe is not pressure tight, an alloy toe shoe is not pressure tight, and a leather toe shoe is not pressure tight. Safety shoes are designed to reduce the likelihood of injury, not to totally prevent injuries. The design of a safety shoe is intended to protect you from injuries that can be the result of falling objects. Failure to follow all warnings and safety instructions can result in serious injury or death. Any use of safety equipment is subject to the rules and regulations of your employer. SAFETY SHOES ARE NOT A SUBSTITUTE FOR AN OVERALL SAFETY PROGRAM, nor are they a substitute for common sense. If you are unsure about the adequacy of the protection provided by the toe material, contact your supervisor. Annual safety footwear inspection is an important part of an employer’s safety program and should be conducted by a qualified professional. All products are sold subject only to the warranties given by the manufacturer. If the product is marked as meeting an ANSI or ASTM standard, then the product carries a manufacturer’s warranty. Saf-Gard Safety Shoe Company/SR Max Slip Resistant Shoes provides no express warranty and expressly disclaims all implied warranties including any implied warranty of merchantability or fitness for any particular purpose.
