

UC-HBCU Applicant Information Tutorial

This tutorial presents important information for eligible applicants for the UC HBCU Initiative faculty grant.

Slide 1: Tutorial Overview

Slide 2: UC-HBCU Initiative Goals

Slide 3: About the UC-HBCU Initiative and Eligibility

Slide 4: Proposal Review Criteria for Internship and Pathways Grants

Slide 5: Review Process

Slides 6–7: How to apply

Slide 8: Timeline

Slide 9: Thinking about applying?

Slide 10: Why get involved

Slides 11: Mentoring

Slide 12: Initiative Highlights

Slide 13: Contact information

Launched in 2011, the **UC-HBCU Initiative** is a faculty grants program that strengthens pathways to graduate education by funding research collaborations between the University of California (UC) and Historically Black Colleges and Universities (HBCUs).

For further information about the Initiative, along with application materials please visit:
<http://www.ucop.edu/uc-hbcu-initiative/index.html>

The Initiative: Two types of awards

1. Summer Research Internship Grant (one year)
 2. Summer Research and Graduate Admissions Pathways Grant (three years)
- Grants are competitively awarded to UC faculty members to host HBCU-enrolled summer research interns and to facilitate faculty research collaborations and other educational activities that serve the goals of the initiative.
 - UC-HBCU Initiative summer research interns who are admitted to any UC Ph.D. program are eligible to receive a competitive funding package. All former UC-HBCU interns admitted to UC Ph.D. programs have received competitive funding packages (typically for five years of support, depending on campus/departmental norms).

Eligibility

Academic Senate faculty members in any discipline at any of the ten campuses of the University of California are eligible to apply. Each grant may have only one Principal Investigator (PI). A PI may have numerous collaborators.

Review Criteria for Internship and Admissions Pathways Grants

Applicants for a one-year Summer Research Internship Support Grant will be evaluated on the first seven areas of criteria listed below and applicants for the Summer Research and Graduate

Admissions Pathways Grant will be evaluated in all eight review areas.

- 1) Strength of UC **faculty commitment** to and involvement in the activities and goals of the project plan (e.g., level, type and frequency of involvement in the project) and the ability of PIs to successfully implement the project plan
- 2) **Departmental support** of the project and a history of contributions and efforts that strengthen inclusive academic environments and experiences for students
- 3) Evidence of **campus support** and/or pledged collaboration to help facilitate the project's success (e.g., letters of support from graduate division deans or other relevant campus representatives)
- 4) **Commitment to the project by HBCU faculty partners** (e.g., by formal endorsement or letters of support/partnership) is required.
- 5) Quality of the **project plan** (approach, structure and quality of planned faculty mentoring of student interns during the summer), as well as provision of support faculty and other mentors for student interns
- 6) **Follow-up mentoring** plan for summer research interns
- 7) Indicators for building **long-term sustainability** between UC and identified HBCUs.
- 8) Strength — and likelihood of effectiveness — of planned graduate admission pathways to **improve inclusion of HBCU scholars in UC Ph.D. programs**, as well as identified steps to institutionalize such efforts within a department to enhance long-term success

Review Process

The faculty grants are awarded by peer review. The review committee includes faculty both from UC campuses and HBCUs.

The review criteria noted previously are comprehensive; they include all the elements scored in the review process.

How to Apply

The image shows a screenshot of the ProposalCentral website. At the top, there is a navigation bar with four tabs: "I AM A(N)", "APPLICANT OR AWARDEE", "PEER REVIEWER", "FUNDER", and "INSTITUTION". The "APPLICANT OR AWARDEE" tab is selected. Below the navigation bar, the main content area is split into two sections. The left section is a dark blue banner with white text that reads: "ProposalCentral for Applicants & Awardees. ProposalCentral enables researchers to tap into funding, get credit for their contributions, and realize the full potential of their scientific efforts." Below this banner are three statistics: "\$28.5 Billion Funded Grants", "280+ Funding Organizations", and "1 Million Research Applications". The right section is a white login form titled "Applicant or Awardee". It contains the text: "Sign in to ProposalCentral to search for funding opportunities, submit grant applications, or manage your profile." Below this text is a "LOGIN WITH ORCID" button. Underneath is the word "OR" and a red box highlights the "USERNAME OR EMAIL" and "PASSWORD" input fields. Below the input fields is a dark blue "LOGIN" button with a red arrow pointing to it. At the bottom of the login form are the links "Forgot your password?" and "Need an account?".

Applications must be submitted via the electronic application system ProposalCentral. Submission instructions and templates are available online through ProposalCentral at: <http://proposalcentral.altum.com/>

1. Select the Grant Opportunities Tab.

2. Look for UC-HCU Initiative on the Grant Maker List.

Press Next to save any changes and go to the next proposal section.

* Project Title
Do not exceed 75 characters.

* Is this proposal a continuation of or related to a previous UC-HBCU initiative grant?

* If yes, select the Prior Proposal?

5. Validate and submit your proposal by noon PT, March 16, 2026.

UC-HBCU 2025–26 Timeline

Monday, March 16, 2026 — Proposals due by noon Pacific Time

July 2026 — Awards announced

December 1, 2026 — Summer intern participant names due to UC-HBCU Initiative

Summer 2027 — Year 1 Summer Research Programs
Site visits by UC-HBCU Initiative leadership

Summer 2028 — Year 2 Summer Research Programs (Pathways grants)

Summer 2029 — Year 3 Summer Research Programs (Pathways grants)

Thinking about applying?

For the internship and pathways grants:

Keep in mind that establishing a substantive relationship with HBCU colleagues is critical to forming a mutually beneficial and sustainable partnership. This idea must be evident in your proposal.

Work in collaboration with your campus graduate division, undergraduate research centers and/or other central services units to make sure your project is taking advantage of the expertise and resources that exist to support the preparation of prospective graduate students. These units can offer support and programming for GRE preparation, workshops to prepare and expose students to transitioning to graduate school, assistance with housing coordination and connections to other summer scholars. Reach out to your local graduate division as you develop your proposal. by I involved?

Why get involved?

To strengthen your program/department

This is an opportunity to strengthen your graduate program and the experience of its scholars by actively cultivating cohorts of varied students who more aptly reflect society. Research indicates that diverse groups learn more and are more effective at problem-solving.

To enhance your research

The relationships UC faculty members build with their HBCU counterparts often aid or complement their own research interests.

To fund an interesting idea you have, one that can make a difference

Design a project that is the best fit for your research interests and departmental needs. It may be an interesting idea that has been difficult to implement due to insufficient funding. This grant program can be a great tool for helping to create an inclusive intellectual environment in your program.

To widen your network and expand your frame of reference

Cultivate a richer relationship with academic colleagues, perhaps outside your typical sphere of interaction. Learn about different types of institutions.

To mentor outstanding HBCU students

The initiative provides an opportunity for you, as well as for postdocs and graduate students who may be involved in your research, to mentor outstanding students from HBCUs.

To have an impact on the academic pipeline

The initiative is successful at enrolling HBCU students. We would like to see even more students choosing UC. Having more students from all backgrounds in doctoral programs is critical to creating an academic pipeline that is reflective of the world.

Mentoring

- PIs participate in and facilitate sustained substantive multifaceted mentoring (SSMM).
- Excellent mentoring is key to meaningful learning experience, cultivating relationships that have long-term impacts on students' careers and lives.
- PIs, faculty mentors, postdocs and graduate student mentors all contribute.

Timing of Mentoring

Mentoring before the summer

Mentoring should begin once the student intern is selected, before the program begins. Early engagement helps students feel more prepared and comfortable as they start their research at UC.

Mentoring during the summer

PI/mentors should meet regularly with the student during the summer program to guide the student's work, monitor the student's transition and navigate the academic culture.

Mentoring after the summer

Following the program, regular contact with interns is expected and is critical to building on the relationships established over the summer. The PI is expected to maintain follow-up contact after the program ends to advise interns as they consider or prepare to apply for graduate school and to support their continued development as scholars. PIs/mentors commonly work with students as they submit papers and posters to conferences. Continued mentorship also proves very valuable for faculty and programs, in hopes of enrolling these students at UC.

UC-HBCU Highlights

- As a result of UC and HBCU faculty partnerships, UC has hosted 1,112 UC-HBCU summer interns across ten campuses since summer 2012.
- UC has 75 Ph.D. fellows enrolled as a direct result of the UC-HBCU Initiative; 61 percent in STEM fields and 39 percent in Social Sciences and Humanities. 54 Ph.D. students have graduated.
- **UC-HBCU partnerships** involve well-known HBCUs such as Howard, Morehouse and Spelman, as well as lesser-known institutions such as Claflin, Tougaloo and University of the Virgin Islands.
- The yield (enrollment) rate for UC-HBCU alumni is 83 percent, compared with 42 percent for academic doctoral applicants generally.
- To enroll former UC-HBCU interns into UC Ph.D. programs, UCOP has allocated permanent resources to provide cost-share fellowships in partnership with campuses.
