

# Update: UC Health

Presentation to CHQI 2017 Colloquium  
February 16, 2017

By John Stobo, MD

# UC Health – A Goal

A goal of UC Health is to promote and facilitate system wide collaboration so that the UC Health related entities and activities can more effectively carry out their clinical service, research, and educational activities. This will be done in a manner which ensures that system wide and local strategies compliment and enhance each other.

# Examples of System Wide Activities

- Contracting with commercial and public payers
- Evaluation by rating agencies
- Cost reduction strategies (ex: Leveraging Scale for Value)
- Collection of “Clinical Data”
- Governance by UC Regents
- Clinical improvement (Center for Health Quality and Innovation)
